PROFESSIONAL SUMMARY

B.Tech Computer Science (AI/ML) student and Full Stack Developer with proven experience delivering production-ready web applications using React.js, Node.js, Express.js, and SQL/NoSQL databases. Built and deployed 2 full-stack projects featuring JWT authentication, RESTful APIs, and responsive UI — demonstrating end-to-end ownership from architecture to deployment. Strong foundation in Data Structures & Algorithms, OOP, and scalable system design.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python, SQL

Frontend: React.js, HTML5, CSS3, Responsive Design, State Management

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Middleware

Databases: MySQL, MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Netlify

Core Concepts: Data Structures & Algorithms, OOP, CRUD Operations, Role-Based Access Control

PROJECTS

Browear – Full Stack E-Commerce Platform

Dec 2025 – Feb 2026

Live Demo: <https://browear.vercel.app>

React.js • Node.js • Express.js • MySQL • JWT

- Architected and deployed a **production-ready** full-stack e-commerce application with **Admin and User role-based access control**, serving distinct dashboards per role
- Engineered **RESTful APIs** covering products, orders, users, and authentication — with JWT token issuance, secure password hashing (bcrypt), and authorization middleware
- Integrated OTP-based email verification flow, reducing unauthorized account creation and improving onboarding security
- Built **10+ reusable React components** (product cards, dynamic cart, forms, dashboard UI) with real-time pricing updates and responsive layouts across all screen sizes
- Reduced development cycle by leveraging modular component architecture, enabling rapid feature iteration across the storefront

Media Vault – Paid Media Sharing Platform

May 2026 – Jun 2026

Live Demo: <https://media-vault-frontend-eight.vercel.app>

React.js • Node.js • Express.js • PostgreSQL

- Designed and built a **full-stack media marketplace** with wallet-based monetization — users unlock premium content using virtual coins, simulating a real payment flow
- Developed a virtual wallet transaction system with balance tracking, coin deduction on purchase, and protected content routes enforced at both frontend and backend layers
- Implemented **PostgreSQL schema** for media assets, user accounts, and wallet transactions; applied backend validation to prevent unauthorized access and data integrity violations
- Delivered a fully **responsive, mobile-friendly UI** with clean navigation, media previews, and gated content UX to drive user engagement

EDUCATION

B.Tech in Computer Science & Engineering (AI/ML)

2023 – 2027

NVR College of Engineering & Technology, Tenali

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems
- Applying academic knowledge through hands-on full-stack projects using React.js, Node.js, and SQL databases
